SUPER STAINER

For Enamel and Water Based Paints

- High Tinting Strength
- Light Fast
- All Colours Intermiscible

Specially formulated for tinting premium quality paints like Acrylic Emulsion, Flat, Luster and Enamel/Oil paint, stoving enamel.

DIRECTION FOR USE

- Shake Super Stainer bottle well before using. Super Stainer should be added to the White Base/White Paint before thinning.
- To obtain the desired shade add Super Stainer, gradually under continuous stirring.
- Because of its high tinting strength small quantity of Super Stainer is enough for obtaining wide range of shades. The shades obtained will depend on the quality of White/Base White, used.

*Not recommended for use in epoxy and chlorinated rubber based paint. **For interior use only***
